TALK TO A PHARMACIST

What is the name of the medicine and what does it do?

How and when do I take it—and for how long? What if I miss a dose?

What are the possible side effects and what should I do if they occur?

What foods, drinks or activities should I avoid while taking this medicine?

Will the new medicine work safely with other medicines and herbal supplements I am taking?

Remember, the more you know about the medicines you take, the better they will help take care of you.

IF YOU CARE
