

*The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.*

Leiters Health is recalling the products listed below. During internal review of the label for this product, a typographical error was noted on both the primary and secondary label. All of the bags were compounded according to approved batch records and conformed to all finished product specifications. The correct quantity of Oxytocin and Sodium Chloride Injection is present in all distributed bags. Leiters Health compounds product F3382 utilizing a premade 500mL 0.9% Sodium Chloride bag and adds 30 Units of Oxytocin to that bag. The primary diluent information contained in the large, yellow band on the primary label is accurate, indicating 30 units of Oxytocin added to a 0.9% Sodium Chloride 500mL IV bag.

**Finished**

<b>Good Item #</b>	<b>NDC #</b>	<b>Established Drug Name</b>
F3206	71449-028-68	Vancomycin HCl 1.25 g PF added to 0.9% Sodium Chloride 250 mL IV Bag
