

*The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.*

Out of an abundance of caution, **Fresenius Kabi Compounding, LLC, d/b/a Fagron Sterile Services (“FSS”)**, a federally registered 503B Outsourcing Facility located in Canton, MA, is recalling the following lots of unexpired Compounded Sterile Product to the hospital / clinic level.

FSS is recalling all CSP units listed in the table above out of an abundance of caution. The recall is related to a potential container defect present in certain Fresenius Kabi *freeflex*® IV bags. Although FSS compounded the affected products under appropriate conditions, there is a potential that the blue administrative port on the *freeflex*® IV bag may be loose and separate. Fresenius Kabi has indicated that the root cause has been determined and corrected.

All lots met Visual Inspection requirements and all product release testing (Sterility, Endotoxin, Potency, pH and Sub-visual Particulate).

This is an isolated incident and there are no other current lots or products affected. We are working in conjunction with the U.S. Food and Drug Administration (FDA) regarding this voluntary recall and this communication has been approved by the FDA.
