

*The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.*

International Medication Systems, Limited (IMS) would like to inform you of a recall involving Epinephrine Injection, USP, 1 mg/10 mL (0.1 mg/mL).

This recall has been initiated due to potential Microbial Contamination of Epinephrine Injection, USP, 1mg/10mL (0.1mg/mL), Lot Number EA038A5, Stock Number 3318. As of the date of this notice, IMS has not found any evidence of actual contaminated units and has received no customer complaints or reports of adverse events from this lot. The use of this product poses a low risk of localized infection in nonimmunocompromised individuals and a moderate risk of a systemic, potentially life-threatening infection in immunocompromised individuals if medical treatment is not provided or is delayed.
