

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

Eugia US LLC (f/k/a AuroMedics Pharma LLC) has initiated a recall to the Retailer level for the product Testosterone cypionate injectable, USP 200 mg/mL (Single dose vial), with lot number 1TC24075A from the US market as an abundant precaution due to receipt of multiple market complaints claiming “Crystallization in vial/ White fragments in the bottom of the vial/ Gelatinous like a jelly inside the medication/ Medication is crystalline and not clear/ Chip inside the medication”.

Testosterone cypionate injectable, USP 200 mg/mL (Single dose vial), is indicated for replacement therapy in the male in conditions associated with symptoms of deficiency or absence of endogenous testosterone.

Use of discrepant medication can lead to injection site reactions, such as pain, redness and swelling and may lead to inaccurate dosing.

Testosterone Cypionate Injection, USP is a clear, pale yellow to yellowish oily solution and is available in two strengths, 100 mg/mL and 200 mg/mL testosterone cypionate, must be stored at 20°C to 25°C (68° to 77°F).

Eugia US LLC began shipping this batch to customers nationwide on January 30, 2025. This recall is being carried out to the retail level.
