

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

Through complaint investigations, BD has identified that specific lots of standalone Texium™ components, and IV infusion sets and syringes containing the Texium™ closed-male Luer component have the potential to leak during use at the connection interface between the Texium™ component and the SmartSite™ Needle-free Connector. BD has confirmed that this issue is limited to the Affected Products listed below.

In instances where leakage occurs, there may be a delay in procedure, treatment interruptions, exposure to hazardous drugs, and/or underdosing of medication.

BD has received a global complaint rate of 0.003% (214 in total) for this issue and to date, there have been no reported serious adverse events as a result of this issue worldwide.
