

*The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.*

Becton, Dickinson and Company (“BD”) is conducting a Drug Recall of specific lots of the BD Chloraprep™ Clear - 1 mL Applicators. The affected product may exhibit an open or incomplete seal on the packaging of the applicator. The drug solution in the ampoule remains sterile.

If a product with a compromised sterile barrier is used, the applicator may have been exposed to microbial contamination. Use of a potentially contaminated applicator could result in no patient harm or may lead to localized skin or soft tissue infection. Less commonly, systemic infection or other infectious complications may occur. Potential signs or symptoms of infection may include fever, chills, localized pain, redness, swelling, drainage, cellulitis, abscess, or sepsis. Infection, if it occurs, may require clinical evaluation and treatment, including antimicrobial therapy, additional procedures, or hospitalization. In rare cases, particularly in critically ill, immunocompromised, or otherwise medically vulnerable patients, severe infection could be life-threatening.

If an affected product has been used, patients should be monitored in accordance with clinical judgment for signs or symptoms of infection. Any suspected infection should be evaluated and treated promptly according to standard clinical practice. Patients who were exposed without issue do not require follow up.

To date, there have been no adverse events reported for this issue worldwide. Affected lots that were distributed by BD beginning in June 2024.

**Affected Lots of BD Chloraprep™ Clear - 1 mL Applicators**

**NDC NUMBER: 54365-400-31**
