

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

Ascend Laboratories is issuing a product recall involving Rizatriptan Benzoate Tablets USP, 5 mg and 10 mg.

An out-of-specification (OOS) result was observed during the analysis of Rizatriptan Benzoate Tablets USP, 5 mg and 10 mg. The observed level of the N-nitroso-dimethyl-rizatriptan impurity was found to exceed the specified limit. Rizatriptan has a tendency to undergo oxidization, which may contribute to the increase of nitrosamine impurity levels during long term stability testing. As a precautionary measure, batches resulting in OOS along with all other non-expired batches are being recalled from the market.

Rizatriptan Benzoate Tablets are prescribed to treat acute migraines. The drug works by constricting blood vessels in the brain, preventing pain signals from reaching the brain and resulting in the inhibition of natural substances that trigger pain, nausea, and other symptoms associated with migraines. Rizatriptan is meant to be used only when needed.

Our firm began shipping this product on October 18, 2022. This recall is being conducted at the RETAIL level.
