

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

On August 6, 2026, Baxter Healthcare Corporation issued an Urgent Drug Recall for the lots of drug products listed below due to the potential of contamination with a beta-lactam drug product. The affected lot numbers were distributed from 2/3/2025 to 7/29/2026 in the United States.

Update: Five of the affected product codes have both a container-label NDC number (printed on the individual product) and a carton-label NDC number (printed on the shipping carton). The below has been updated to include both the container-label and carton-label NDC numbers. The updated information below is in bold.

Hazard Involved: Products containing beta-lactam compounds may cause allergic reactions, including life-threatening reactions, in individuals allergic to beta-lactam compounds. To date, Baxter has not confirmed any beta-lactam contamination in distributed non-beta-lactam product nor received any reports of adverse events related to this issue.

Product Code	Product Description	Lot Number	Expiration Date	NDC Number
2G3322	MYXREDLIN (insulin human in 0.9% sodium chloride), 100 units/ 100 mL (1 unit/mL) in a single-dose container, for intravenous use.	NC188630	12/31/2027	0338-0126-12
