

*The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.*

This is to inform you that B. Braun Medical Inc., (BBMI) is issuing a pharmaceutical recall for one (1) lot of product LAC RNG INJ 1L L7500, due to the potential for particulate matter in solution.

The depth of this recall is to the hospital/healthcare facility level. This recall is being conducted with the knowledge of the United States Food & Drug Administration and Health Canada.

BBMI has identified through a complaint the potential for the product to contain particulate matter in solution. In the complaint investigation, the particles were identified primarily as cellulose cotton fibers, with individual particles also identified as cellulose wood fiber and polystyrene.

To date there have been no reports of serious injury or death associated with this issue. If the particulate matter is observed before use, a minor delay could occur while obtaining a replacement product. If the particulate matter is not observed before use and the container is used on a patient, there is a potential for the particulate to be infused into the circulatory system. This could lead to patient harm that may require additional medical intervention and/or lead to permanent impairment or death.

**PRODUCT:** LAC RNG INJ 1L

**NDC NUMBER:** 0264-7750-00

**LOT NUMBER:** J4H077

**EXPIRATION DATE:** NOV 30, 2026

**DISTRIBUTION DATES:** AUG 28, 2024 - SEP 30, 2024
