

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

This is to inform you of a RETAIL LEVEL product recall involving Atorvastatin Calcium Tablets USP, 10 mg, 20 mg, 40 mg and 80 mg by Ascend Laboratories, LLC.

During an investigation of Atorvastatin Calcium Tablets USP, 10 mg, 20 mg, 40 mg, and 80 mg, out-of specification results for dissolution testing were confirmed for thirty batches, detailed in the table below.

Atorvastatin is in a class of medications called HMG-CoA reductase inhibitors (statins). It works by slowing the production of cholesterol in the body to decrease the amount of cholesterol that may build up on the walls of the arteries and block blood flow to the heart, brain, and other parts of the body. The primary hazard associated with the affected batches is therapeutic failure or reduced efficacy. Because the tablets fail to meet the dissolution specification, patients would not receive the intended dose of the medication within the stipulated time. However, no adverse events have been reported to our firm to date.

Our firm began shipping this product on November 21, 2024.
