

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

STAQ Pharma Inc, (NSF 143) is initiating a recall of specific lots of sterile injectable syringes related to potential missing variable data on the primary label (i.e., compound date, lot number, and expiration date). There are no current potential health hazards associated with the use of this product. Use of the product may prevent necessary information from being included in the patient records. No adverse events or other issues have occurred as a result. The FDA is aware and we are in the process of notifying affected customers and taking all necessary steps to retrieve the impacted products.

The listed lots below are impacted:

STAQ Pharma Lot Numbers	Drug Name	Concentration	Fill Volume	NDC	Expiration Date
25156673A	Ketamine Hydrochloride	10 mg / mL	5 mL in 5 mL	73177- 0156-02	02FEB2026
