

The Board of Pharmacy has received notice of the following product recall:

Integrated Health Concepts Inc., dba Conversio Health (“Conversio Health”), is conducting a recall of all compounded inhalation medications within expiry effective today, November 12, 2019.

We have received no reports of injury or illness associated with the use of our products; however, we are initiating this voluntary recall due to lack of sterility assurance concerns raised by the U.S. Food and Drug Administration (“FDA”) during a recent inspection of our compounding pharmacy.

Patients who have received any of Conversio Health’s compounded formulations produced from June 17, 2019, to October 31, 2019, are being instructed to properly destroy any unused product in their possession. We are working with patients and physicians to ensure there is not a lapse in patient care.

Conversio Health is committed to adhering to all applicable requirements to ensure that compounded medications are prepared, packed and held under sanitary conditions. The Company is actively engaging in remediation of areas of concern observed by the FDA. Conversio Health has temporarily ceased production of all sterile compounded formulations until such time as remedial measures have been completed.

A list of the compounded products dispensed is attached.

COMPOUNDS
Description
