

THREET24

CA Board of Pharmacy

December 4, 2024

RE: PUBLIC COMMENT

Dear Supervisors,

I am appearing for you today to appeal to your sense of duty to protect the consumers of California from a known toxin that has been administered by participating pharmacies – the COVID19 Vaccine. In addition, I am appealing to your duty to protect employees of pharmacies who are effectively aiding in the administration of this toxin. I have called into your Board calls a total of FIVE times: November 2023, December 2023, April 2024, July 2024 and November 2024. At each meeting I reported the number of deaths that have been reported from a vaccine administered by a pharmacy in California. A copy of the data from VAERS is attached.

At the end of this letter you will find my backstory and credentials. I am coming before you to demand an investigation and full halt to the administration of this product in your pharmacies. I also request you notify consumers immediately. I also request you investigate if your pharmacies are trained and compliant in filing Vaccine Adverse Event Reports into the VAERS System as required by law. I would also request an agenda item on a future CA Pharmacy Board meeting to review how many adverse event reports have been filed, and what course of action was taken to remedy the problem.

This is my hill. I am vaccine injured by the shot. Microangiopathy, tinnitus, two detached retinas (five emergency eye surgeries. I worked at the Butte County Public Health COVID19 Vaccination Clinics from January – June 2021 and witnessed injuries at the clinic, effectively becoming a whistleblower against the County. I was forced to quit my wonderful job at Enloe Health after they implemented the mandated booster shot (which I could not physically afford to take). For the past 2.5 years I have been a member of the medical freedom movement working with honest doctors, researchers and journalists from around the globe to fight this evil pharmaceutical product that is part of a depopulation ploy and an attack on our US Military that has been decimated by these horrible vaccines.

My Mom was murdered by four shots of Moderna and my daughter is a medical assistant in Alameda County coerced to take three shots. I ran a tough campaign for Butte County Supervisor in March, losing to Doug Teeter the incumbent – my sole purpose was to get to the media to tell my story, wake people up, and if elected stop the Public Health Director from

mass murder. I will not leave this planet until there is accountability and full stop to this manmade disaster.

With Robert F Kennedy Jr being positioned as new HHS Secretary, there's a new sheriff in town. In addition, Senator Ron Johnson issues a press release on November 20, 2024 demanding HHS, FDA and CDC preserve all records pertaining to the COVID-19 Vaccines. I have personally been on a zoom call with Senator Johnson who is our biggest supporter. His sole purpose in running for reelection was to support the vax-injured and bereaved community, and get these shots halted.

Here are some additional resources and I am always available for follow up meetings or phone calls (even if confidential):

- 1) REACT19: The current leading lobbyist and subject matter resource for the COVID19 vaccine injured and bereaved. Their website contains every existing credible science research paper, legal claims, and health detox resources.**

<https://react19.org/>

- 2) FORMER FEDS FREEDOM FOUNDATION: Another professional group of legal professionals fighting COVID crimes including the deadly hospital protocol using Remdesivir. There are thousands of stories of victims murdered in the hospital (including Enloe) and vaccine injured (mine included). There are support groups available weekly for the injured and widowed.**

<https://chbmp.org/>

- 3) AMERICANS FOR HEALTH FREEDOM: A current campaign led by Dr. Mary Talley-Bowden who has solicited the names of any candidate and/or elected official from across the Country who will pledge to commit to doing everything to stop the shots and not take any campaign funds from big pharma.**

<https://www.americansforhealthfreedom.org/>

- 4) MILITARY ACCOUNTABILITY: A petition signed by 37,870 veterans who oppose the COVID19 vaccine. The open letter to the American people is attached (I only printed out the first page of signatures so go to the website to read them all and sign).**

<https://militaryaccountability.net/>

- 5) **VAERSAware:** A database created by a Chico State grad that is a dashboard of analytics pulled from the CDC VAERS System by lot number, state, product. Please go research and have your Health Director look up your lot information.

<https://www.vaersaware.com/>

- 6) **MUZZLED TRUTH:** Former California Department of Public Health Public Information Officer Ronald F Owens Jr. warned his leadership about the problems with the COVID19 vaccine including a statement made by HHS Secretary Xavier Becerra that the vaccines were killing people of color.

<https://muzzledtruth.com/>

- 7) **Medical Doctors for COVID Ethics International:** I am a member of this global team of researchers, doctors and scientists meeting twice a week to share knowledge and hear from professionals working for medical freedom.

Sincerely,

Julie Threet

CREDENTIALS & BACKSTORY

JULIE THREET

Education: BS in Business Management, University of Wyoming 1986

Medical Terminology & Billing courses, Butte Community College 2018

Work: 25 years as HR Exec in High-Tech firms in Silicon Valley (1986-2011)

- Includes Benefit Contracts, Compensation Plans, Mergers

6 years as Medical Volunteer at Enloe Health (2015-2021)

- Includes Patient Ambassador, Board of Directors, COVID Vaccine Clinic

Current: Disabled by Moderna COVID19 Vaccine (2021)

- Includes microangiopathy, tinnitus, two detached retinas

My Story:

I am a vaccine-injured victim of the COVID-19 Moderna shot. I was a volunteer Patient Ambassador working for Enloe Medical Center in Chico, CA when COVID hit. During my shift I spent time with patients on the neuro-trauma floor helping them with anything non-medical. I supported loved ones who were suffering in the waiting room while loved ones were in the ICU after a tragic accident. I helped children stay positive while a parent recovered from surgery. I was also on their Volunteer Services Board of Directors serving as Chair, Special Events, and worked as a Gift Shop Associate helping raise money for the Enloe Foundation. I loved my new career at the hospital. I had moved to Chico in 2014 after losing my husband unexpectedly in 2011. I was a 50 year old widow alone with two dogs and suffering a mid-life crisis.

Before my new journey to Chico, I was a Human Resources Executive. 25 years in Silicon Valley working for many high-tech firms in the specialty function of HR Operations. I led large international teams developing health benefit plans (medical, dental, vision, life/disability), brokering retirement plans (401k/pension), designing compensation incentive programs (base pay, bonus, sales and stock) and implementing HR systems. I traveled the world for work and was directly involved at the C-Suite level managing mergers and acquisitions for start-up companies like Octel Communications and International Network Services to large multi-national firms like NetApp and Lucent Technologies. I Loved my career but after my husband died I hit a wall. Once both kids graduated high school, I sold everything and moved north to Chico. And started a brand new career – in healthcare.

In addition to joining the Enloe Volunteer Services team, I took medical classes at Butte Community College. Medical Terminology, Medical Coding, Medical Administration. Truth be told I had always wanted to be a nurse but opted for a BS in Business Management from the University of Wyoming instead. I have also been a lifelong volunteer who has a natural

desire to help people. I had a pet therapy dog I took the Palo Alto VA. I am a Daughter of the American Revolution. I led a project with the American Red Cross in high school. And I bleed red, white and blue. A lover of the United States of America. A believer in our Constitution and democratic principles.

In January, 2021, after the insanity of the 2020 COVID lockdown, I was assigned to work for the Butte County Public Health Department as a non-medical "nurse helper" at their COVID Vaccination Clinics. My roles included helping nurses in the draw room filling syringes, working the floor with nurses putting together "syringe kits", helping vaccinate patients, and working administration on special projects (e.g. preparing vaccination cards). We thought we were "Rosie the Riveter" helping a war effort. I helped administer 200+ shots per hour at Meriam Park and the Silver Dollar Fairgrounds. Yes, I have PTSD after knowing what I now know.

Shortly after taking the two Moderna shots in January and February, 2021 as required for this new job (which I gladly took as I bought the "safe and effective" lie), I experienced "brain fog". It was unusual and I sought an opinion from a neurologist in March. I had zero thought of the vaccine being the problem. Results of a CT-scan came back with a diagnosis of "micro-angiopathy" or a lesion on my right basal ganglia. I was told there was no treatment, I was lucky I didn't have a stroke, and we needed to keep watch every 6 months (as I might develop a brain tumor or multiple sclerosis). During that summer I then started experiencing horrific tinnitus in both ears. At this point I started considering there was a problem with the vaccine. Especially as the problems I witnessed AT THE CLINIC started to mount. The menstrual disruptions described by the young college nurses I supported were openly discussed. I approached Dr Andy Miller the Medical Officer for the County about what I was hearing. You see, my daughter was a young woman working at the mass vaccination clinics in Alameda County and she wanted to be a Mom one day. "NO JULIE, SHOTS ARE SAFE" retorted Dr Miller (clearly disgusted I had even asked the question).

The day a Chico State track athlete sat in the chair to get his shot, and fell immediately into a seizure on the floor, was an event I will never soon forget. He was an amazing young healthy man. As the nurse pushed the poison into his arm, his immune system literally jumped and he fell straight into her, seizing on the floor. I ran to get Dr Miller. He was down for 20 minutes but ultimately walked out (or so I assumed as I was back to helping other patients take the shot and didn't see what happened). Although I know there were NO AMBULANCES rolling up. I still wonder if they filed a VAERS Report. But back then, we were not giving information about VAERS to people. Just these little "V-Safe" fliers that described an app to schedule the next shot and call someone with questions. But I left every clinic shift with a sense of pride in helping save my community. At one point I looked across this large warehouse at the fairgrounds and saw ALL of Chico – young/old, multiple generations of families, rich businessmen, young crazy college students with blue hair, and of course the homeless. WOW, we are doing such amazing work to help save Butte County.

All of this came to a crashing halt in January, 2022. I discovered proof of my vaccine injury. An article in the Swiss Policy Research Foundation described similar injuries as mine for a 26-yr old and her vaccine problem caused MS. Her brain scan looked identical to mine. An article by Dr. Robert Malone introduced me to howbadismybatch.com. The day I entered Moderna 042L20A and 023M20A and found them at the top of the list was quite a shock. And the day I entered them into medalerts.org and literally read the death reports for all 40+ who died literally brought me to tears. I didn't know what to do. AND I LOVED ENLOE. I didn't want to quit or go stomping mad into Mike Wiltermood's office (CEO) demanding answers. I was so confused. So the day they walked into the Gift Shop with a notice that the booster was mandated in order for me to keep my job, was a blow. I had two choices. Take the booster and risk further physical harm, even death, but keep the career I loved surrounded by all my friends. Or, walk away from it all and take a hit to my mental health, but preserve my physical well-being (as it was). I walked. Never looked back. Tried to explain and showed them my proof but they didn't want to see it. I sent email to the CEO and all those I worked for at the clinics begging them to notify everyone who got my same batches (no discussion of a bioweapon only suggestion that these two were spoiled). I got zero response. No acknowledgement. No offer to help me with my injuries. This from a hospital who gets high awards for patient-centered care. Hypocrites. All my friends turned their backs on me. Accused me of bringing COVID into the hospital. My Mom didn't understand why I was no longer going to work as I had been describing this amazing journey and happiness during the COVID clinics where I felt I was saving humanity.

That same month my left retina would detach requiring emergency repair surgery. Followed by a cataract procedure. Followed by the right eye retina detachment. Followed by a failed emergency repair procedure. Followed by a buckle being placed around my right retina. Followed by a cataract place in the right eye. FIVE EMERGENCY EYE SURGERIES.

The worst day of my life was August 15, 2022. I woke up to a phone call that my beautiful, healthy mother, had died that morning while on vacation in Buffalo, Wyoming. Died suddenly. Like the movie. No pre-existing conditions. No prior underlying problems. No sign of any vaccine issues. She took no medications. She had only been hospitalized for a surgical procedure on a bone problem years before COVID. She walked daily. Perfect weight. The most generous human on the planet. The coroner called it "Sudden Adult Death Syndrome" or SADS. Like SIDS where babies die unexpectedly (which we now know to also be vaccine-induced). The Wyoming State Pathologist called it "Sudden Cardiac Event" which is now listed on her death certificate.

I CALL IT VACCINE MURDER. HER ONLY MEDICAL RECORD WAS HER VACCINE CARD WHICH I HAD. FOUR SHOTS OF MODERNA. KILLED HER. My life's purpose is now clear. Fighting for medical freedom. Supporting the medical freedom doctors with VAERS Research (as both me and Mom have VAERS Reports and I now know VAERS better than VAERS knows VAERS). I will get Butte County Public Health held to account for what they have done here (I have all the batch numbers of the products injected into my county from a FOIA). I am at every Board of

Supervisor meeting trying to plead with them to stop the shots. I attend Chico City Council and School Board meetings offering detox strategies. I ran for County Supervisor on March 5th to try and get into a position to actually force BCPH to pull the shots. I signed Americans for Health Freedom pledge. I am a member of the Medical Doctors for COVID Ethics International team and attend as many of the biweekly meetings as I can for information. I have attended the Former Feds Freedom Coalition survivor meetings and recently gave my vaccine injury case interview to the COVID Humanity Betrayal Memory Project. I know people in Chico who had loved ones murdered at Enloe by Remdesivir. I joined Daily Clout as a member of the Warroom Posse. I have worked with Stanford Graham an attorney for Dr. David E Martin with VAERS Victims to help convince sheriffs of this crime and find victims to support his criminal case against Fauci/Baric.

I wrote my Mom's vaccine-fatality story for the React19 Bereaved site only to have my niece, the trustee for Mom, order them to remove it. You see, my family does NOT share my view that mom was killed by the vaccine. They literally have called me crazy. My family is no longer able to speak. They imposed their own personal belief that "grandma wouldn't want to make a fuss" over my own need to get answers. My brother locked me out of my childhood home afraid I would take out revenge on my childhood home. Absurd. What has this COVID nightmare done to people? It tore mine apart. My son is despondent for losing the best friend he had – his Grandma Jane. My daughter is a medical assistant for Sutter Health forced to take three shots of Moderna and obviously can't speak to me about my new purpose in life. I do work with Albert Benavidez (aka Welcome the Eagle) who founded VAERSAware.com and is a Chico State grad from Silicon Valley (small world). He helped me with Mom's VAERS Reports and we recorded the entire process that is available as a tutorial on his bitchute channel. I have been interviewed by Reinette Senum, shared my vaccine story with a podcaster named Researcher on Spotify and appeared on the Patriot's Prayer Podcast. My greatest achievement thus far was being quoted by the great Dr Peter McCullough in one of his substack articles as I provided him with the VAERS info on those injured by 7+ doses of the COVID vaccine.

I record a podcast on my Rumble channel "Prayinghawk144" where I review the actual victims statements published by VAERS. I know these are the key to some legal action. I post all of my public comment appearances on that channel as well as Telegram. I have started calling into the California Board of Pharmacy imploring them to set up a committee to investigate the reported problems for vaccines administered by a California pharmacy that I am able to pull from VAERS. Three meetings thus far and no response. Maybe if I go in person in July I can look them in the eyes and get someone to care enough to act.

So, I am a lone wolf. A lone warrior active everyday on social media and using any means to fight for the future of this country. I have gone from a pro-vaxxer having believed in them all, given them to me and my children, as well as my dogs, to a ZERO-VAXXER. NO MORE. NOT EVEN FOR MY DOGS. I have been canceled everywhere in Chico. Two Republican women's clubs terminated my membership last summer for fighting against Enloe and fighting the vaccine. Most in this town are associated with Enloe – it has been here since 1913. Most

were born or have had family die here. Get surgery and give birth. They are a 298-bed Level II Trauma Center that operates the only regional FlightCare air ambulance, serving SIX counties with 3,000 staff members and 300+ physicians. They are building a brand new Cancer Center and were given a \$3M donation from hometown hero Aaron Rodgers. They are ranked in top 250 best hospitals and have been recognized as a Planetree Gold hospital. So you see, fighting them in public is NOT a fun proposition.

I WANT JUSTICE FOR ME AND OTHERS IN BUTTE COUNTY INJURED AND KILLED BY THE COVID19 VACCINE. THIS LIES SQUARELY ON BUTTE COUNTY PUBLIC HEALTH. DANETTE YORK WAS AND STILL IS PUBLIC HEALTH DIRECTOR. DR DAVID CANTON AS MEDICAL OFFICER. ENLOE HEALTH AND DR ANDY MILLER WHO LED THE COVID19 VACCINATION CLINICS WHERE I WORKED AND WAS MANDATED TO GET THE SHOT (AND WHERE I WAS FORCED TO RESIGN). DR MILLER WAS BUTTE COUNTY MEDICAL OFFICER DURING COVID WHO DEPLOYED MANY FRAUDULENT MEANS TO PUSH AN EXPERIMENTAL DRUG. SO WE NEED INVESTIGATIONS INTO THE BUTTE COUNTY PUBLIC HEALTH CLINIC.

One key piece of evidence is their record of inventory of the experimental COVID19 vaccines they ordered, stored and deployed into Butte County. It is full of administrative errors with Pfizer shots labeled as Moderna. It has information about one RECALLED Moderna batch that WAS ADMINISTERED INTO BUTTE COUNTY ARMS BUT THOSE PEOPLE WERE NEVER NOTIFIED. And every single batch has a record of a death as listed in the official CDC website VAERS. You can also check on VAERSAware.com for the relative lot toxicity for each batch ACTUALLY ADMINISTERED in Butte County, THIS INFORMATION WAS REQUESTED TO BE PUT ON THE BUTTE COUNTY PUBLIC HEALTH WEBSITE. Tod Kimmelshue and Doug Teeter told me personally they would do this. THEY HAVE NOT. THIS IS FRAUD. The term "safe and effective" is STILL displayed on the BCPH website. THIS IS FRAUD.

With this all being said, above all, my goal in life, is to get JUSTICE FOR JANE. Santa Clara County Public Death Director Sara Cody and Governor Gavin Newsom must pay for the early death of my mother, in addition to the Palo Alto Medical Foundation who administered the four shots and never gave her informed consent. I also hold every professional sports team that my mom loved responsible – SF 49ers who opened up their Santa Clara facility to give shots, the Golden State Warriors, SF Giants & SJ Sharks who pushed shots on their players. I promise you Mom, I will not leave this planet until someone is behind bars.

Write-up: At approximately 10:15AM on 9.12.2024., Flublok and Spikevax were administered concomitantly in different arms for Patient, a 64-year-old patient with a date of birth of (redacted). All the protocols implemented and required by Pharmacy were followed; I thoroughly checked the consent form for completion, verbally verified the patient's personal information and selected answers, offered the patient her receipts and VIS documents, administered both vaccines according to guidelines, counseled the patient on potential side effects, and recommended that the patient remain in the waiting room for at least fifteen minutes after the vaccines. This week, I received a letter from the patient's husband, informing me that she suffered a sudden cardiac arrest on 9.16.2024. According to her husband, she passed away one week after a good annual physical with her primary care physician on 9.9.2024, and four days after receiving the vaccines. He indicated in his letter that his wife was fine and did not exhibit any symptoms until Sunday. The wife has been my patient since 2014, and I have provided her the influenza vaccine ten times and the COVID-19 vaccine a total of eight times. She has never experienced an adverse reaction to the vaccines administered. The patient only received medications for her glaucoma and Barrett's esophagus from our pharmacy. She temporarily took the anti-hypertensive medication hydrochlorothiazide 12.5MG for six months in 2022, but she was not on any cardiovascular medications recently.

Previous Vaccinations:

Other Medications: vitamins

Current Illness: none

Preexisting Conditions: none , very active and healthy

Allergies: none

Diagnostic Lab Data: Autopsy phone call of ruptured aortic aneurysm. Still awaiting final paper report. phone call from coroner was made to (mother) a few days after Dec 1.

CDC Split Type:

Write-up: 11/10-11/25 Patient made statements about a Rapid Heart Rate, that he was monitoring with his apple watch. 11/28/23 presumed date of death based on last contact made with patient and clothing he was found in. 12/1/23 found in his home, documented dead. We were told it was likely a "medical event",

which seemed unlikely as he was very athletic and healthy. He participated in marathons and exercised frequently. Autopsy later revealed a ruptured aortic aneurysm . The coroner never asked about vaccination status. We are surprised that out top rate CDC, the best in the world, does not have a protocol for investigating sudden and unexpected death in healthy young individuals as it relates to vaccination, particularly for such a novel vaccine. Patient had 5 covid vaccines over the course of 2 years. There is no family history of aneurysm. We have not been informed of any underlying genetic conditions that would have caused his aneurysm at such a young age. We hope that scientific attention is given to this particular long term and cumulative side effect of vaccination so that other young and healthy lives are saved. Here are his other covid doses listed on his card: 1. 3/20/21 Pfizer (EP7534) 2. 4/10/21 Pfizer (EW0153) 3. 12/13/21 Moderna (030H21B) 4. 9/25/22 Pfizer (GH9693).

Diagnostic Lab Data:
CDC Split Type:

Write-up: Patient was given both Flublok and Comirnaty vaccines on 10/21/24. Patient stated that she started experiencing symptoms of chest pain and high heart rate that same night. The following day, 10/22/24, patient went to the ER to get checked out. She says that she no longer has symptoms of chest pain but is still experiencing high heart rate (current heart rate was in the 90s). Patient was consulted to continue to monitor her symptoms and keep track of her heart rate daily. Advised her to contact her doctor or go to ER if her symptoms get worst.

Previous Vaccinations:

Other Medications: Pt had a chief complaint of feeling dizzy after 5 minutes of getting both Moderna 2023-2024 Covid Vaccine 0.25ml and Fluarix 2023-2024 at the same time.

Current Illness: None

Preexisting Conditions: None

Allergies: None

Diagnostic Lab Data:

CDC Split Type:

Write-up: After receiving both Moderna (kids version) and Fluarix, Pt was waiting in the vaccination room to have his father complete the shots combo of flu and covid. In between the two shots of his dad's Pt noticed a bit of dizziness abnormality. The pharmacist stopped and have Pt put his head down to the Lap and it subsided and the pharmacist also tries to put cooling water bottle on the forehead (which were the recommended guidelines from 2023). Pt felt better but looked a bit pale so he was wearing one of the AI measurable HR watched and he read out 86. This tasks swayed his mind from the anxiety mode of vaccine. He waited in the waiting area for 15 minutes and everything was fine.

Allergies: Carbamazepine, Penicillin.

Diagnostic Lab Data: n/a

CDC Split Type:

Write-up: Pt experienced Leg Weakness 12 hours after vaccine was given. It started 10/19/24 at 5am, and lasted until afternoon. I spoke to pt at 5:30 pm 10/19/24, and pt said it has self-resolved. Pt said the leg weakness was fairly severe, but as of the time of speaking on the phone, pt said all the symptoms have resolved. I counseled pt to call EMS if it occurs again.

Current Illness: None

Preexisting Conditions: None

Allergies: None

Diagnostic Lab Data: first urgent care visit was on 07/04/2017 for pain medication (NORCO, KEFLEX, and DIFLUCAN) (same day patient reported adverse reaction); second visit was to the ER on 07/05/2017 and she was given prednisone 50mg daily.

CDC Split Type:

Write-up: Patient had a reaction from the Tdap shot, she had swelling and pain at site (site was hard and numb) then pain started to radiate to her whole arm and then to her neck (neck was stiff), she went to urgent care and they gave her pain medication and she was also prescribed prednisone 50 mg daily for 5 days. This all happened over a course of a week. Patient states she is getting better.

Current Illness:**Preexisting Conditions:****Allergies:** NKA**Diagnostic Lab Data:****CDC Split Type:**

Write-up: 7-3-17: PNEUMOVAX 23 was administered around 4:45pm. Patient said the next day she developed extreme tiredness, fatigue, low grade fever, soreness and redness at injection site on upper left arm. She was so tired that she was pretty much in bed all day and it was hard to move the left arm. The redness moved down about 2 inches from the injection site later the day and formed like a red band circled around her upper left arm also warm when she touched it. She took a hot shower the same day 7-4-17. Patient tried ice compression on and off all day on 7-5-17. She felt better and she could move around. Pt said the red band is gone by 7-7-17 and she is back to normal.

CDC Split Type:

Write-up: Event Syncope: Paleness, Nausea, Dizziness, Fainting, and Visual Disturbance. Patient Fainted, but regained consciousness with a few seconds. I had patient lie on the ground with blanket and pillow underneath, provided cold compress on head, neck, and injection site. I also provide OJ to increase patients blood sugar. I monitored patient for 30 to 45 minutes, notified family via phone. Once patient was stable patient returned home, I contacted patient at 11:31 AM, to make sure patient was home safe and told her to rest for the day. Patient was informed to call Pharmacy or PCP if any further reactions. Also she can take Tylenol or Motrin for injection site soreness.
