As medication costs continue to rise, many Americans are turning to the internet in search of less expensive prescription drugs. Besides potentially lower prices, shopping online offers greater convenience. In addition, patients who feel uncomfortable discussing medical problems such as erectile dysfunction or skin conditions with health care providers may discreetly seek medications from online pharmacies, which often do not require a valid prescription.

Unfortunately, consumers who buy prescription medicines online could be putting their health at risk. Medications that are marketed by some internet pharmacies as authentic may be counterfeit, contaminated, substandard, expired or otherwise unsafe. Drugs approved in other countries or manufactured by unknown sources may have variations or different ingredients that could cause a patient to get more ill, develop a medication resistance, or cause new side effects.

According to a 2018 report by the National Association of Boards of Pharmacy (NABP), a review of 11,749 internet sites selling prescription medications...
By Victor Law, RPh
President, Board of Pharmacy

The Communication and Public Education Committee is currently working on giving credits to those who read this newsletter.

I am honored and would like to express my gratitude to my fellow board members who have elected me as the new president of the board. Thank you for entrusting me with all the responsibilities this esteemed office includes. I honor the commitment and appreciate you all. I would like to thank especially Dr. Amy Gutierrez, our outgoing president, for her dedicated and hard work these last three years.

As your new board president, I am passionate about achieving specific goals during my term in office, and I seek the attention and effort of all members as I accomplish these objectives.

First, I plan to increase the efficiency of pertinent licensee issues at the board level. For example, as many of you have experienced, the amount of time needed to complete tasks such as applying for a new license, renewing an old existing license or filing for an appeal in a disciplinary case is often excessive. Like a number of government agencies, our system requires detailed reports, and results are frequently delayed for a number of reasons. My goal is to look into these matters and find solutions to expedite and hopefully reduce the amount of time needed for effective outcomes. The effective processing of licenses for professionals such as pharmacists, pharmacy technicians, interns and designated representatives needs to be rapid and efficient.

Next, I see issues in the current policies and procedures regarding citations and fines. This board’s job, as a consumer protection agency, is to protect the public and discipline wrongdoers. During that process, we must also inherit the role of educating the licensees and avoid inadvertent punishment. If licensees have been fined unfairly or have been punished unreasonably and their case is final, I would encourage them to testify at a board or committee meeting so we can work together to find a solution. This proactive measure can benefit the concerns of licensees in the future.

My final immediate goal is to encourage more public participation in the process of maintaining professional ethics. Licensees should not be afraid of undue retaliation by the board if they come forward and express their opinions. I hope to schedule meetings outside of Sacramento, closer to licensee worksites and residences. My goal is to create a network that allows licensees to express opinions in a convenient forum. I firmly believe that it is through mutual communication between the board and its licensees that we can formulate better policies and procedures to benefit the profession. By strengthening our network, we can protect public health and safety policies.

This board thrives with more active participation and increasing success from the licensees who pay their fees every year. I dedicate my position as board president to creating a safe space for all voices. I am dedicated to the advancement of our profession and the continued education of our licensees. As the organization continues to grow and thrive, I encourage all of you to remain active and informed. For all further updates and changes in important matters, please read on.

The board’s mission

The Board of Pharmacy protects and promotes the health and safety of Californians by pursuing the highest quality of pharmacist care and the appropriate use of pharmaceuticals through education, communication, licensing, legislation, regulation and enforcement.
Medication errors: Patient consultation, learning from reported mistakes are keys to prevention

Medication errors account for about 17 percent of all complaints received and investigated by the Board of Pharmacy during the past three years.

The National Coordinating Council for Medication Error Reporting and Prevention (NCCMERP) defines a medication error as “any preventable event that may cause or lead to inappropriate medication use or patient harm while the medication is in the control of the health care professional, patient or consumer.”

According to the Food and Drug Administration (FDA), the most common causes of medication errors are:

- Poor communication.
- Ambiguities in product names, directions for use, medical abbreviations or writing.
- Poor procedures or techniques.
- Patient misuse because of poor understanding of the directions for using the product.

Medication errors are often human errors. They can happen at any stage of drug therapy for a patient, including prescribing, repackaging, dispensing, administering or monitoring. Examples of errors include:

- The wrong medication for the patient’s condition is prescribed.
- Incorrect information is entered on the prescription container label, resulting in the patient taking the wrong drug or dosage.
- A drug is dispensed that is contraindicated if taken with another drug.
- A drug is dispensed beyond its expiration date.
- A correctly filled medication is furnished to the wrong patient at the pharmacy counter.

Sometimes pharmacists attribute the problem to heavy workloads – too many prescriptions to fill and not enough staff to fill them. When investigating a medication error complaint, board inspectors typically document the number of prescriptions filled and the pharmacy staffing on the day of the error. If it is determined that workload factors contributed to the error, the pharmacy and pharmacists may be charged with violations.

Preventing errors – patient consultation

However, medication errors are preventable. One of the most important ways to prevent errors is for pharmacists to provide patients with proper consultation when dispensing prescriptions. California Code of Regulations (CCR), title 16, section 1707.2, requires pharmacists to provide consultation to patients:

- Upon request.
- Whenever the pharmacist deems it warranted in his or her professional judgment.
- Whenever a prescription medication has not previously been dispensed to the patient.
- Whenever a prescription medication is dispensed in a new dosage form or strength or with new written directions.

Under California’s duty to consult patients, the pharmacist must initiate the consultation with the patient or the patient’s agent. It is a violation of this requirement for pharmacy staff to screen patients with such questions as, “Have you taken this medication before?” or “Do you have any questions for the pharmacist?” Patients or their agents who decline a consultation must express this directly to the pharmacist.
Buying drugs online
Continued from page 1

found approximately 96 percent operated out of compliance with federal and state laws and/or NABP patient safety and pharmacy practice standards. Most of these noncompliant sites did not require a valid prescription, according to the NABP report.

The danger is especially great for consumers who buy opioids online. In June, the FDA warned nine online networks that operate a total of 53 websites to stop marketing potentially dangerous, unapproved and misbranded versions of opioid medications, including tramadol and oxycodone.

Even so-called “Canadian” pharmacies – which many Americans believe sell safe medications at lower costs – can be dangerous. A 2017 NABP report found 74 percent of 108 pharmacy websites with “Canada” or “Canadian” in their name or web address sold drugs that originated outside Canada. Half of these websites sold drugs from India or a combination of other countries where counterfeit products are known to originate – and none of the websites required a valid prescription, according to the NABP report.

Finally, besides health risks, illegal internet pharmacies expose unwary shoppers to other types of problems – including credit card fraud, identity theft, internet scams and even computer viruses.

What pharmacists can do

As trusted medication experts, pharmacists can play a critical role in educating consumers about the dangers of buying prescription drugs online. Many patients visit their pharmacy on a regular basis – enabling pharmacists to follow up with them on their treatments, ask about their medications and conditions, and be alert for signs that a patient may be getting drugs from an online pharmacy.

According to the FDA, individuals who may consider buying medications online include:

- Patients without adequate prescription insurance coverage.
- Low-income and older patients who need long-term maintenance drugs.
- People seeking “lifestyle” medicines, such as drugs for erectile dysfunction.
- People seeking financial assistance for prescription medications.
- Patients accustomed to home delivery who have met their prescription coverage limits.

Pharmacists can educate patients and caregivers about the risks of buying prescription medications from internet pharmacies. If patients do plan to shop for medications online, advise them that legitimate internet pharmacies:

- Provide a physical address and valid telephone number in the United States.
- Are licensed in the state where they operate. (If a pharmacy is located outside California, it still must be licensed to ship into California. Consumers can verify pharmacies licensed in California at the California State Board of Pharmacy website.)
- Have a pharmacist available to answer questions.

Also, refer consumers to the NABP website, www.nabp.pharmacy, for information about shopping for prescription drugs online. NABP provides a .pharmacy (pronounced “dot pharmacy) domain – like .com or .net – to be used in URLs for pharmacy and medication websites that are properly licensed and follow applicable laws and business best practices.

For more information

The Board of Pharmacy has a fact sheet about counterfeit prescription drugs that includes information about ordering prescription medications online. The fact sheet can be viewed and downloaded here.

BeSafeRx is an FDA campaign to raise awareness of the dangers of buying prescription medicines from fake online pharmacies. The website includes educational materials for consumers and health care professionals.
Medication errors
Continued from page 3
Consultation helps ensure the correct medication is being furnished to the proper patient in the proper dose for the proper condition. Communication between patient and pharmacist also can help ensure the prescription is compatible with the patient’s other medications, and the patient understands how to take the medication.

Report medication errors
Medication errors also can be prevented when health care professionals learn from each other. The board encourages pharmacists to report errors to recognized programs that pool reports from all types of health care practitioners, manufacturers and consumers. These organizations analyze the information to alert health care professionals about trends in medication errors. The purpose is not to assign blame, but rather to help health care professionals understand why the errors occurred and how to prevent or correct them.

Pharmacists may report errors to:

- The Institute for Safe Medication Practices (ISMP) – Visit the section on reporting medication errors.
- FDA MedWatch – Obtain an online reporting form or call (800) FDA-1088 to report medication errors or adverse drug side effects.

Monetary awards for medication errors must be reported
Pharmacists or their insurers must report to the board any professional errors – including medication errors – that result in a settlement or arbitration award of $3,000 or more, pursuant to Business and Professions Code (BPC) sections 801 and 802.

CDPH issues standing order for naloxone
The director of the California Department of Public Health (CDPH) recently issued a statewide standing order for naloxone hydrochloride to facilitate distribution of the medication, which reverses opioid overdose. The standing order is intended to enable local health departments, treatment centers, needle exchange programs, law enforcement and others community groups and agencies to distribute naloxone to individuals who are at risk of an opioid overdose.

Pharmacists do not need this standing order to dispense naloxone. State law authorizes California pharmacists to furnish naloxone without a prescription pursuant to a protocol approved by the California State Board of Pharmacy. Pharmacists who possess the training required by the protocol may furnish the medication to patients who are using opioids or who are in contact with anyone using opioid pain medication or street drugs such as heroin.

Read the full text of the board’s protocol for specific requirements for furnishing naloxone. The protocol, which was approved by the Medical Board of California, is found in California Code of Regulations (CCR), title 16, section 1746.3.

The Board of Pharmacy offers online information and resources for furnishing naloxone – including the protocol text, sample naloxone labels, FAQs, and fact sheets and screening questions for patients printed in seven languages. Go to the board’s website and click on the Licensees tab at the top of the homepage; then click on “Important Information for Licensees” to find “Naloxone.” You also can go directly to the Naloxone page here.
Inventory reconciliation regulation - FAQs

On April 1, 2018, a new board regulation took effect – California Code of Regulations, title 16, section 1715.65, Inventory Reconciliation Report of Controlled Substances.

The board believes this regulation will aid pharmacies and clinics in preventing losses of controlled drugs and identifying losses early.

As with any regulation, the board seeks compliance as early as possible. For the first few months, the board will focus on education to promote understanding of the regulation. During the transition, any inspection will focus on the pharmacy’s or clinic’s good faith efforts to comply with the regulation.

Here is a summary of CCR section 1715.65 by subsection:

(a) Requires all pharmacies, and all clinics licensed under Business and Professions Code section 4180 or 4190 (“clinics”), to perform periodic inventory and reconciliation functions for all controlled drugs. (Note: No frequency of these duties is specified in the regulation except for Schedule II drugs, which are discussed below.)

(b) Requires the pharmacist-in-charge (PIC) or the clinic’s consultant pharmacist to:

(1) Establish and maintain secure methods to prevent losses of controlled drugs.
(2) Establish written policies and procedures for performing reconciliation reports.
(3) Review all inventory and reconciliation reports.

(c) Requires each pharmacy or clinic to prepare at least a quarterly inventory reconciliation report of all federal Schedule II medications, which is based on:

(1) A physical count of all federal Schedule II medications at the time of each inventory.
(2) A review of all acquisition and disposition records since the last inventory.
(3) A comparison of 1 and 2 to identify any differences (losses or overages).
(4) Collection and retention of records to compile each inventory report.
(5) The report must identify the possible causes of overages.

(d) Requires a pharmacy or clinic to file a report of losses and known causes to the board within 30 days of discovery or within 14 days if theft, self-use or diversion by a board licensee is the cause. If the cause is unknown, this section requires the pharmacy or clinic to further investigate to identify the causes and to take corrective action to prevent additional losses.

(e) Requires the inventory reconciliation report to be signed and dated by the individual(s) performing the inventory and countersigned by the PIC or professional director (for a clinic).

(f) Requires a new PIC to complete an inventory reconciliation report within 30 days of becoming PIC. Encourages the outgoing PIC to do a reconciliation report before leaving.

See Inventory reconciliation FAQs, Page 7
Inventory reconciliation FAQs
Continued from page 6

(g) For INPATIENT HOSPITAL PHARMACIES: Requires a separate quarterly inventory reconciliation report for federal Schedule II drugs stored within the pharmacy and for each of the pharmacy’s satellite locations.

(h) For any pharmacy servicing an AUTOMATED DRUG DELIVERY SYSTEM (regardless of location): Requires the PIC to:

(1) Ensure that all controlled substances added to any automated drug delivery system are accounted for.
(2) Ensure that access to any automated drug delivery system is limited to authorized facility personnel only.
(3) Ensure that any discrepancy or unusual access to the controlled substances in the automated drug delivery system is evaluated.
(4) Ensure that confirmed losses are reported to the board timely.

1. The regulation took effect April 1, 2018. Should I have performed my initial inventory beginning April 1, 2018?

No. The board expects pharmacies and clinics to transition to satisfy the inventory reconciliation requirements over a short period of time, but not necessarily by April 1. An initial physical count of the Schedule II medications is the first step.

2. Are there any drugs in addition to federal Schedule II controlled substances affected by the requirement to do a physical count and reconciliation each quarter?

No. The regulation requires a quarterly count and reconciliation of only federal Schedule II drugs. California and the federal government have separate controlled substances schedules, although there is much similarity between the two. Nevertheless, the board determined that the federal Schedule II drug list is more current and complete, and the federal list is the reference for reporting dispensing into the Controlled Substances Utilization Review and Evaluation System (CURES) in California. A pharmacy may on its own add additional drugs to its reconciliation program.

3. Can a pharmacy or clinic estimate (instead of physically counting) federal Schedule II medications for the quarterly inventory?

No. A physical count of every Schedule II medication is required for the quarterly inventory reconciliation report.

4. Subsection (a) of the regulation requires a pharmacy or clinic to “periodically” perform inventory and reconciliation functions for controlled substances. Does this mean every quarter I must count and reconcile all controlled substances?

No. However, periodically (and under federal law at least every two years) all controlled substances must be inventoried. The board encourages more frequent counting of controlled medications to identify and prevent losses of Schedule III, IV and V drugs. The regulation only specifies the frequency of reconciliation duties for federal Schedule II drugs; the appropriate frequency for all other controlled drugs should be determined by the standard of practice in the community under the circumstances of the pharmacy.

5. Does a perpetual inventory system satisfy the requirements of this regulation?

No. The use of a perpetual inventory system does not satisfy the regulation. The regulation requires both a physical count and reconciliation with all acquisitions and dispositions be performed every 90 days.

See Inventory reconciliation FAQs, Page 8
6. **If I use a perpetual inventory, can I use the physical counts made for the perpetual inventory instead of physically counting the drugs specifically for the inventory reconciliation report?**

   It depends. The regulation requires a physical count of each Schedule II medication every quarter, which is then used as part of the inventory reconciliation analysis and report. If, for example, the pharmacy or clinic physically counts the specific drug stock each time a Schedule II drug is dispensed or acquired, that count might be used to fulfill the physical count required by the inventory reconciliation regulation, but the PIC or consultant will need additional data. For any drug where there were no dispositions or acquisitions during the quarterly reconciliation period (and therefore no physical count through the perpetual inventory system), a physical count of the Schedule II drug must be made because each drug must be physically counted at least quarterly.

7. **I have a recent physical count for each Schedule II drug. What do I compare that to? What do I do with that information?**

   For each medication, the PIC or consultant would start with the physical count of the medication from the last inventory reconciliation report and:

   1. Add all acquisitions and subtract all dispositions that occurred during the reconciliation period (no greater than 90 days) to identify the amount of drug stock that should be on hand (expected drug stock).

   2. Compare the expected drug stock to the actual physical inventory count.

   3. If there is a difference, attempt to identify the source of overage or shortage. **NOTE:** If there is a discrepancy and the recent physical count is from a perpetual inventory system, the board urges the facility to initiate a supplementary physical count of the medication. Determine if the facility needs to take corrective action, including modify its policies and procedures, conduct an investigation, institute additional security or modify its practices.

8. **Does an inpatient hospital pharmacy or a pharmacy servicing onsite or offsite emergency kits (e-kits) have to complete an inventory reconciliation report for the Schedule II controlled substances contained within the e-kits?**

   There is no specific reconciliation report for the kits themselves, although a pharmacy’s replenishment of Schedule II drugs removed from the emergency kits would be part of a pharmacy’s disposition of medication.

9. **An inventory reconciliation report of all Schedule II drugs shall be compiled at least every three months and, in order to complete the report, the inventory must be compared with a review of drugs that entered and left the pharmacy since the previous inventory reconciliation. Since no reconciliation report exists before April 1, 2018, does that mean that the first inventory reconciliation report will not be due before July 1, 2018?**

   To initiate the reconciliation process and establish a baseline for future inventory reconciliation reports, a physical count of all Schedule II medications must be undertaken. The board would generally expect a pharmacy to perform this count on or after April 1, 2018. To allow time to develop meaningful written policies and procedures for the inventory reconciliation process, the board recommends a pharmacy or clinic perform the inventory reconciliation.
counts within the first 90 days after April 1 (i.e., July 1, 2018).

Additionally, any new PIC on or after April 1, 2018, is required to prepare a report upon assuming the PIC position. Within the first three months after April 1, 2018, the board would expect the new PIC, within 30 days, to have performed an inventory count of all Schedule II medications consistent with the requirements to prepare an inventory reconciliation report.

10. An initial inventory does not appear to be required as part of this rule change. Since a reconciliation report cannot be compiled without an initial reference count, would it be appropriate for pharmacies or clinics to perform a physical count of all Schedule II drugs during the initial three-month period (after April 1), and then begin reconciliation processes after July 1st?

Yes. See the response to question 9.

11. A PIC must complete an inventory reconciliation report within 30 days of becoming pharmacist-in-charge. If there is a PIC change on April 1, 2018, how can the PIC create a reconciliation report, given there may not be a recent inventory or reconciliation report to refer to?

In this specific case, if prior data were unavailable because of the implementation date of the regulation, the board would expect the PIC to at least perform an inventory of all Schedule II medications consistent with the requirements to prepare the reconciliation report within 30 days (May 1, 2018).

12. Should the inventory reconciliation report encompass only significant losses, as defined by the DEA, or should the report encompass any discrepancy? If the former, doesn’t a pharmacy’s or clinic’s filing of DEA Form 106 with the DEA already provide the requested information to the board if the board receives a copy of that report?

California law requires that any loss of controlled substances be reported to the board within 30 days – and reported within 14 days where drug theft, self-use or diversion have been committed by a board licensee. These are existing requirements, predating the inventory reconciliation requirements. The reconciliation regulation restates the reporting of drug loss requirements for clarity. A DEA Form 106 may be used to make this report to the board. Also, a separate report is required to the DEA (on a Form 106) of any significant loss of a controlled substance.

13. Will the board create a new process for reporting Schedule II controlled substances drug losses? Is there a standard form or email address to submit this information?

The board will not create a new or additional process for reporting the loss of controlled substances. A DEA Form 106 or a written statement containing specified details of the loss is sufficient. Check the board’s website on how to report a drug theft or loss.

14. If my pharmacy or clinic is unable to identify the cause of the loss, should we wait to report the loss to the board until the cause is determined?

No. Reporting is required for any loss of controlled substances within, at most, 30 days regardless if a cause of the loss was identified. Should a cause be identified later, an additional report can be made to the board. If the cause is theft, diversion or self-use by a board licensee, the report must be made within 14 days.

However, the regulation also directs that “further investigation shall be undertaken to identify the cause and actions necessary to prevent additional losses of controlled substance” where the source of a loss cannot be readily identified.
15. Does a pharmacy have to maintain actual paper documents of the records used to compile each inventory reconciliation report? Are electronic records acceptable?

All records used to compile each inventory reconciliation report shall be maintained in the pharmacy or clinic for at least three years in a readily retrievable form. Provided the records are readily retrievable, electronic records are acceptable.

16. Can the inventory reconciliation report be completed by multiple persons?

Yes. All persons involved in performing the inventory must sign and date the report, which also must be countersigned by the PIC or professional director (if a clinic).

17. How do I physically count liquid Schedule II medications for the reconciliation report?

The board does not expect a count or measurement of every liquid you have as part of the quarterly reconciliation. Instead, the board recommends:

- **Where there is a unit of use container,** a pharmacist should accept the measurement printed on the container and include it in the physical count. However, if the unit of use container looks damaged or altered in some manner, treat the item as quarantined.

- **Where multidose containers are used,** a pharmacist should subtract the amount dispensed from the measurement printed on the container. Subsequently, the pharmacist should document the remaining amount on the container itself. Example: A pharmacist dispensed 240ml from a 473ml stock bottle. The pharmacist would subtract 240ml from 473ml and document the difference of 233ml on the stock bottle. The remaining amount of 233ml would be used as the physical count for the reconciliation report.

18. Can unlicensed personnel (e.g., clerks) perform the inventory necessary to complete the inventory reconciliation report?

As identified in CCR section 1793.2, the counting of pharmaceuticals is considered a “nondiscretionary task” – a duty a pharmacy technician may perform. Accordingly, unlicensed personnel cannot complete the inventory function.
Board plans to adopt new emergency regulation on beyond use dates for compounded drugs

The Board of Pharmacy has filed to readopt an emergency regulation related to establishing beyond use dates (BUDs) for compounded drug preparations. The emergency regulation amends California Code of Regulations, title 16, section 1735.2, subdivision (i). The emergency rule allows for an extension of BUDs for nonsterile compounded drug preparations. It also makes clear that stability studies and suitability and integrity tests are required to extend the BUDs only for sterile compounded drug preparations.

Emergency regulations are effective for 180 days. The emergency compounding regulation took effect Dec. 19, 2017, and was set to expire June 19, 2018. Consequently, the board intends to readopt the emergency regulation, which the Office of Administrative Law is expected to approve.

In the meantime, the board is proceeding with a regular rulemaking action to make the emergency compounding regulation permanent. The regular rulemaking process will include a public comment period. Additional information about the regular rulemaking process will be posted as it becomes available under Pending Regulations on the board’s website.

www.pharmacy.ca.gov

Board updates disciplinary guidelines

The Board of Pharmacy has amended California Code of Regulations, title 16, section 1760, to require the board to consider disciplinary guidelines updated in 2017 in deciding disciplinary action under the Administrative Procedures Act. The amended regulation incorporates the disciplinary guidelines by reference.

The guidelines are intended to help licensees, lawyers, administrative law judges and others involved in the disciplinary process. They were developed to establish consistency and to impose the most appropriate penalty in administrative disciplinary actions for similar offenses on a statewide basis.

The guidelines may be viewed and downloaded for printing as a booklet. Click the link above or enter the title “Disciplinary Guidelines – A Manual of Disciplinary Guidelines and Model Disciplinary Orders” in the search box on the board’s website at www.pharmacy.ca.gov.
Wholesalers, are you ready for an inspection?

Be prepared. Whether the board is conducting an inspection related to a complaint or a request is made for a routine inspection, having important records readily retrievable will help expedite the process. The board recommends wholesalers’ designated representatives and designated representatives-in-charge become aware of the location of the following records. Maintaining these records in a centralized area may help when a board inspector arrives at your front door.

Policies and Procedures
- Receipt of drugs.
- Security of drugs.
- Storage of drugs.
- Inventory of drugs.
- Distribution of drugs.
- Identifying, recording, and reporting theft and losses.
- Correcting errors and inaccuracies in inventory.
- Maintaining records, including retention periods.
- List of officers, directors, managers and other people in charge of distribution, handling and storage with a description of their duties and summary of qualifications.

Records
- Wholesaler self-assessment, past three years
- Proof demonstrating dangerous drugs are sold to entities authorized to purchase, such as copies of buyer’s licenses or verification of licensure.
- Temperature and humidity monitoring.
- Offsite storage waiver for records (if applicable).
- Purchase invoices.
- Sales invoices.
- Pedigrees.
- Proof of delivers, including proof if using a common carrier, retain for at least three years.
- Bill of lading (if applicable)
- Proof dangerous drugs and devices are purchased from the manufacturer or entities licensed with the board.
- Destruction records for dangerous drugs and devices, including records for drugs sent to a reverse distributor.

Controlled Substances
- Biennial inventory for Schedule II, III, IV and V drugs.
- Power of Attorney to execute DEA 222 or CSOS.
- DEA 106 form and reports of loss to the board.
- Executed DEA 222 Forms or CSOS reconciled with dates and quantities received recorded.
- Employee screening procedures for felony and misdemeanor convictions.
- Employee screening procedures for use of controlled substances not prescribed by a physician.
- Notification to employees regarding their responsibility to report drug diversion.
- Proof controlled substances are sold to entities registered with the DEA.

Training Records
- Proof of training and experience to assure compliance with licensing requirements.

Licenses and Registrations
- California wholesaler license.
- DEA registration.
- Nonresident wholesaler licenses to ship into other states.

Miscellaneous Reports
- Able to produce records of purchase, sale and transfer, as a hardcopy and electronic copy.
- Reports of sales of dangerous drugs subject to abuse as designated by the board (when requested).
- Tracking sales of preferential and contract priced dangerous drugs.
- Reports of suspicious orders of controlled substances placed by a California licensed pharmacy or wholesaler, upon discovery.
Wholesalers are asked to report key details on suspicious orders of controlled substances

There is a new California law that may impact your wholesaler distribution company. On Oct. 7, 2017, Governor Brown signed into law Assembly Bill 401. This bill added Business and Professions Code section 4169.1, which requires:

A wholesaler, upon discovery, shall notify the board in writing of any suspicious orders of controlled substances placed by a California-licensed pharmacy or wholesaler by providing the board a copy of the information that the wholesaler provides to the United States Drug Enforcement Administration.

Suspicious orders include, but are not limited to, orders of unusual size, orders deviating substantially from a normal pattern, and orders of unusual frequency.

Accordingly, effective Jan. 1, 2018, all drug wholesalers licensed by the California State Board of Pharmacy must report suspicious orders upon discovery to the board. Reports can be emailed to wholesalesuspiciousorders@dca.ca.gov.

The scope of reports to the federal Drug Enforcement Administration is established by the Code of Federal Regulations, title 21, section 1301.74.

Subdivision (b) states: The registrant shall design and operate a system to disclose to the registrant suspicious orders of controlled substances. The registrant shall inform the Field Division Office of the Administration in his area of suspicious orders when discovered by the registrant. Suspicious orders include orders of unusual size, orders deviating substantially from a normal pattern, and orders of unusual frequency.

To effectively facilitate the policy behind AB 401, the board requests that reports include explicit information as to why the wholesaler deemed the order suspicious.

The board has already received reports from some wholesalers and appreciates their diligence. However, some reports lack clarity or sufficient information for the board to investigate. For example, a report that “ABC Pharmacy placed an order for 1,000 10/325 hydrocodone APAP” does not identify why the wholesaler flagged the order as suspicious.

Information to include in report

To effectively facilitate the policy behind AB 401, the board requests that reports include explicit information as to why the wholesaler deemed the order suspicious. For example, indicate if (1) the order was of an unusual size, (2) the order deviated substantially from the normal pattern, or (3) the order was of an unusual frequency.

If the wholesaler uses an automated program to generate reports, identify the criteria that triggered the report.

This additional information provided at the outset will make the reports more meaningful and will save the board and the wholesaler from having to use their resources to seek or provide additional information.

All members of the pharmaceutical drug chain must work together to address the epidemic of misuse and abuse of pharmaceutical drugs in the United States. Proper reporting of suspicious sales is one step for the board to address potential violations and abuse within the chain.

The board has sent out written notices to all its licensed wholesalers who distribute both controlled and noncontrolled pharmaceuticals. We look forward to working with our licensees to obtain meaningful data. Should you have any questions, please contact Chief of Enforcement Tom Lenox at (916) 201-0515 or tom.lenox@dca.ca.gov.
FDA warns of risks in using MAT with benzodiazepines

The Food and Drug Administration (FDA) has issued a safety announcement advising that opioid addiction medications buprenorphine and methadone should not be withheld from patients taking benzodiazepines or other central nervous system (CNS) depressants.

The announcement notes that the combined use of medication assisted treatment (MAT) drugs with benzodiazepines or CNS depressants increases the risk of serious side effects. However, the statement says, the risks usually are outweighed by the harm caused by untreated opioid addiction.

The announcement says careful medication management can reduce these risks. The FDA is requiring that this information be added to the buprenorphine and methadone drug labels along with detailed recommendations for minimizing the use of MAT drugs and benzodiazepines altogether.

The FDA advises health care professionals to develop a treatment plan when buprenorphine or methadone is used in combination with benzodiazepines or other CNS depressants. Health care providers also are urged to take several actions and precautions, including:

- Educating patients about the serious risks of combined use, including overdose and death, that can occur with CNS depressants even when used as prescribed, as well as when used illicitly.
- Developing strategies to manage the use of prescribed or illicit benzodiazepines or other CNS depressants when starting MAT.
- Tapering the benzodiazepine or CNS depressant to discontinuation if possible.
- Verifying the diagnosis if a patient is receiving prescribed benzodiazepines or other CNS depressants for anxiety or insomnia, and considering other treatment options for these conditions.
- Recognizing that patients may require MAT medications indefinitely and their use should continue for as long as patients are benefiting and their use contributes to the intended treatment goals.
- Coordinating care to ensure other prescribers are aware of the patient’s buprenorphine or methadone treatment.
- Monitoring for illicit drug use, including urine or blood screening.

In August 2016, the FDA issued a warning about the combined use of pain or medicines containing opioids with benzodiazepines or other CNS depressants. Since then, the agency has continued to evaluate the evidence regarding combined use of these medications.

Application Processing Times

How long is it taking the Board of Pharmacy to process your application?

As of July 17, 2018, staff was processing applications in the number of days indicated below:

- Pharmacies: 43 days
- Pharmacist exam: 45 days
- Pharmacy technician: 35 days
- Wholesaler: 29 days
- Advanced practice pharmacist: 18 days
Pharmacist honor roll:
50 years of service to California

The Board of Pharmacy honors California pharmacists who have had active status licenses for at least 50 years. The board gratefully acknowledges their longtime contributions to the pharmacy profession and to the health of Californians and their communities.

These pharmacists recently received certificates commemorating 50 years of service and an invitation to be publicly recognized at a Board of Pharmacy meeting:

Bagdasarian, Richard Fowler, CA
Barranti, Richard Norman Brentwood, CA
Becker, Peter H. Murchison, TX
Berman, Bert Pasadena, CA
Blowers, Russell Fred Newark, CA
Boragno, Robert Joseph Corona del Mar, CA

Q&A: Out-of-state e-scripts for Schedule II medications

Q: I received an electronic prescription for a Schedule II controlled substance medication from a doctor outside California. Can I fill it?

Relevant laws:

- Health and Safety Code (HSC) section 11164.1(a)(1) and (b)
- Business and Professions Code (BPC) section 2290.5(a)(3) and (b)

A: An out-of-state Schedule II prescription can be filled by a California pharmacy (provided the prescription conforms to the other state's regulations), but the medication must be delivered to the patient in the other state (i.e., prescriptions filled by mail-order pharmacies), as required by HSC 11164.1.

With the advent of telehealth, California pharmacies are allowed to fill an **out-of-state electronic Schedule II prescription** if the out-of-state prescriber is **also a licensed as a California physician, pursuant to BPC 2290.5(a)(3)**. This section requires the prescriber to be licensed in California but does not require the patient to have in-person contact with the prescriber.

See the Medical Board of California website for more information on practicing medicine through telehealth.

Got questions? Ask an inspector!

The Board of Pharmacy welcomes questions from licensees related to pharmacy laws and regulations.

Note that **board staff and inspectors cannot provide legal advice**. However, they can identify laws and regulations that may help you find answers to your questions. If you need legal advice, you are advised to contact a lawyer.

You may ask a question by email, fax or phone. Inspectors are available to answer questions by phone on Tuesday and Thursday.

- Email: ask.inspector@dca.ca.gov. Please include your name, organization, phone number and the best time to reach you.
- Fax: (916) 574-8618.
- Phone: (916) 574-7900 from 8 a.m. to 4:30 p.m. Tuesday and Thursday.

Did you know …

Certified optometrists may prescribe codeine with compounds, hydrocodone with compounds, and tramadol. Use of the products is limited to three days, with a referral to an ophthalmologist if pain persists. See Business and Professions Code (BPC) section 3041(c)(14).

**AB 443** (Salas, Chapter 549, Statutes of 2017) added tramadol to the list of controlled substances that optometrists who are certified to use therapeutic pharmaceutical agents may use and prescribe. The bill amends BPC section 3041 and expands the scope of optometry practice to allow for greater optometrist independence, the administration of specified vaccines, and the treatment of additional specified eye conditions.

The changes took effect Jan. 1, 2018.
Certain prescribers must check CURES beginning Oct. 2, 2018

The California Department of Justice (DOJ) has issued an announcement certifying CURES is ready for statewide use as of April 2, 2018. Pursuant to Health and Safety Code section 11165.4(e), beginning Oct. 2, 2018, certain health care practitioners must consult CURES before prescribing a Schedule II, III or IV controlled substance

- for the first time, and
- at least every four months thereafter, if the controlled substance remains part of the patient’s treatment plan.

The requirement to consult CURES applies to health care practitioners who are authorized to prescribe, order, administer or furnish controlled substances, including:

- dentists
- physicians
- naturopathic doctors
- optometrists
- osteopathic doctors
- physician assistants
- podiatrists
- registered certified nurse midwives (furnishing)
- registered nurse practitioners (furnishing)

The requirement does not apply to pharmacists or veterinarians.

The Medical Board of California (MBC) has created a CURES webpage with information and resources to help prescribers comply with the new requirement. The MBC also has created a flyer that discusses when prescribers must consult CURES and exemptions to the requirement.

The DOJ provides information about CURES registration, user guides and frequently asked questions at www.oag.ca.gov/cures. For questions about CURES or training requests, contact DOJ staff at CURES@doj.ca.gov or (916) 210-3187. The Board of Pharmacy provides resources and links to websites related to CURES at www.pharmacy.ca.gov/licensees/cures.

Although they are not required to consult CURES, pharmacists are using the database regularly to prevent the diversion and abuse of controlled substances. As of March 31, 2018, pharmacists made up 24 percent of all health care providers registered to use CURES. Pharmacists also ran 57 percent of all patient activity reports that were reviewed in CURES in March 2018.

Note: The phrase “controlled substance” as used in this guide refers to a Schedule II, Schedule III, or Schedule IV controlled substance.
FDA delays some provisions of drug supply chain law

The Food and Drug Administration (FDA) has announced a delay in some provisions of the Drug Supply Chain Security Act (DSCSA).

Signed into law in November 2013, the DSCSA created traceability requirements for pharmaceuticals throughout the supply chain and called for implementing an electronic, interoperable system for product tracking within 10 years. Among other requirements, the law set a Nov. 27, 2017, deadline for drug manufacturers to start affixing or imprinting a product identifier to each package and homogenous case of product.

However, in a November 2017 draft guidance document, the FDA indicated it would not take action against manufacturers who did not add a product identifier to each package and homogenous case intended to be introduced into the drug supply chain before Nov. 27, 2017. This “grandfathering” exemption delays implementation of track-and-trace requirements for manufacturers for one year – until Nov. 27, 2018.

Consequently, track-and-trace requirements also are delayed by one year for supply chain partners downstream. The requirements will take effect for wholesalers on Nov. 27, 2019, and for dispensers – including pharmacies – on Nov. 27, 2020. The guidance provides details on how the respective exemptions applies to manufacturers, wholesalers and dispensers.

Click the link above to view the guidance – “Grandfathering Policy for Packages and Homogenous Cases of Product Without a Product Identifier” – or search for it in the Procedural category on the FDA’s drug guidance webpage.

The FDA website also offers a DSCSA section for pharmacists that includes a flyer – Protect Your Patients: Know Your Responsibilities under the Drug Supply Chain Security Act – that can be downloaded and printed.

General information about the DSCSA’s history and requirements also can be found in the article “Drug Supply Chain Security Act Requires Tracking, Tracing” in the October 2017 issue of The Script.
Pass rates reported for pharmacist exams

Pass rates for the California Practice Standards and Jurisprudence Examination (CPJE) and the North American Pharmacist Licensure Examination (NAPLEX) are released twice annually, generally in spring and fall. The Board of Pharmacy posts the exam pass rates on its website.

**CPJE**

This spring, the Board of Pharmacy reported a pass rate of 51.8 percent for all candidates who took the CPJE from October 2017 through March 2018. (The pass rate for California pharmacy school graduates was 63.6 percent.) The overall rate compares with results last fall, when the board reported a pass rate of 78.8 percent for all candidates who took the CPJE from April through September 2017.

For the full annual period of April 2017 through March 2018, the CPJE pass rate was 70.3 percent.

A comparison of annual CPJE pass/fail rates for the past five years:

</tbody>
</table>

*Note: New content outline in effect.

**NAPLEX**

The NAPLEX pass rate for all candidates who took the CPJE from October 2017 to March 2018 was 88.5 percent. (The rate is based on scores associated with candidates who reported their NAPLEX scores to the board and took the CPJE during October 2017 to March 2018, regardless of when they took the NAPLEX.) Last fall, the pass rate for all NAPLEX candidates from April to September 2017 was 93.6 percent.

A comparison of annual NAPLEX pass/fail rates for the past five years:

Perform patient assessments
Advanced practice pharmacists assess patients for hypertension, cholesterol, diabetes, penicillin allergies and other types of health conditions.

Order drug therapy-related tests
Advanced practice pharmacists order and interpret drug-therapy related tests needed to maximize treatment, such as renal function tests, serum drug levels, and CBC tests.

Collaborate in evaluating diseases
Advanced practice pharmacists participate in evaluating and managing diseases and health conditions in collaboration with other health care providers.

Refer patients to other providers
Advanced practice pharmacists refer patients to other health care providers, including primary care physicians, cardiologists, nephrologists and podiatrists.

Initiate, adjust or discontinue drug therapy
Advanced practice pharmacists may initiate, adjust or discontinue drug therapy for a patient pursuant to authorization by the patient’s treating prescriber.

The Board of Pharmacy recently developed an educational poster depicting types of services that an advanced practice pharmacist (APh) can provide under California pharmacy law. The poster also describes the board’s requirements for receiving an APh license.

The board began licensing advanced practice pharmacists Jan. 1, 2017. As of July 1, 2018, the board had issued 334 APh licenses.

Did you know …
Facilities, pharmacists, pharmacy technicians, intern pharmacists and designated representatives are required to register for email notifications from the Board of Pharmacy within 60 days of obtaining a license or at the time of license renewal. In addition, licensees must update their registration within 30 days of changing their email address.

The process is easy! To register your email address and receive email notifications from the board, click here or visit the board’s website and subscribe to the email notification list under Quick Hits. Email addresses are confidential and not posted on the board’s online license verification system.
Board elects new officers

The California State Board of Pharmacy has elected new officers for 2018-19.

Victor Law of Los Angeles was elected president at a board meeting May 2 in San Diego. The board also chose Gregory N. Lippe of Woodland Hills as vice president and re-elected Allen Schaad of Sacramento as treasurer. The new officers’ terms began June 1, 2018.

Mr. Law, a licensee member, has served on the board since 2012. He has been chief pharmacist and president of Alpha Medical Pharmacy Inc. since 1987. He has been a member of the California Pharmacists Association since 1982 and was president of the San Gabriel Valley Chapter. He earned his bachelor of pharmacy degree from the University of Oklahoma in 1976.

Mr. Lippe, a public member, has been on the board since 2009. He is a certified public accountant and has been president at Gregory N. Lippe Accountancy Corp. since 1981. He has been active in civic and business affairs and has served on the boards of multiple community organizations.

Mr. Schaad, a licensee member, joined the board in 2014. He has been a pharmacist at RxRelief since 2013 and was director of pharmacy at Mercy General Hospital in Sacramento from 2012 to 2013 and from 1999 to 2007. He earned a master of arts degree in counseling psychology from University of San Francisco.

Shirley B. Kim is appointed to the board

Shirley B. Kim of Los Angeles was appointed in May as a public member of the Board of Pharmacy by Gov. Edmund G. Brown Jr.

Ms. Kim has been a lawyer and associate at Norton Rose Fulbright US LLP since 2016. She was legislative director at the California Faculty Association from 2011 to 2013 and in the office of Assembly Member Henry T. Perea from 2010 to 2011. She served as senior legislative assistant for Assembly Majority Leader Alberto Torrico from 2007 to 2010.

She earned a bachelor’s degree in sociology and political science from University of California, Davis, in 2006. She graduated from University of California, Irvine, School of Law in 2016.

Her term will expire in 2022.

Did you know…

The Board of Pharmacy has 13 members, including seven registered pharmacists and six public representatives. Members are appointed to four-year terms by the Governor, the Assembly Speaker and the Senate Rules Committee.

Members may serve only two terms. Each member receives compensation of $100 per diem and necessary expenses.

Photos and biographies of all members are posted on the board’s website.
**Explanation of disciplinary terms**

**Accusation filed** – An accusation is the document containing the charges and allegations of violations of the law that is filed when an agency is seeking to discipline a licensee.

**Effective date of action** – The date the disciplinary action goes into operation.

**Revocation or revoked** – The license is canceled as a result of disciplinary action by the board, and the licensee’s right to practice or operate a board-licensed entity is ended.

**Revoked, stayed** – The license is revoked, but the revocation is postponed until the board determines whether the licensee has failed to comply with specific probationary conditions, which may include suspension of the licensee’s right to practice.

**Stipulated settlement** – The board and a licensee mutually agree to settle a disciplinary case brought by the board by way of a settlement agreement.

**Stayed** – The revocation of suspension action is postponed, and the operation or practice may continue so long as the licensee fully complies with any specified terms and conditions.

**Probation** – The licensee may continue to practice or operate a board-licensed entity under specific terms and conditions for a specific period of time.

**Voluntary surrender** – The licensee has agreed to surrender his or her license, and the right to practice or operate a board-licensed entity is ended. The board may agree to accept the surrender of a license through a “stipulation” or agreement.

**Suspension** - The licensee is prohibited from practicing or operating a board-licensed entity for a specific period of time.

**Suspension/probation** - The licensee is prohibited from practicing or operating for a specific period of time and the right to practice or operate is contingent with specific terms and conditions during the probationary period.

**PC 23 order issued** - The licensee is restricted from practicing or operating by the terms of court issued under the provisions of Penal Code section 23.

**Public reprimand** – Resulting from a disciplinary action, the licensee is issued a letter of public reprimand.

**Reinstatement of license** – A previously revoked or suspended license is reinstated with or without specified terms and conditions.

**Statement of issues** – A legal document that details the factual or legal basis for refusing to grant or issue a license.

**Disciplinary actions**

**OCT. 1 TO DEC. 31, 2017**

**Designated Representative**

Hoffman, Erika M., EXC 20558, Administrative Case AC 5185
Huntington Beach, CA

**Summary**: Violations include operating an unlicensed entity that received prescriptions for compounded drug products, reviewed the orders and then received the drugs back from another pharmacy for sale; repackaging drugs into smaller units without appropriate patient package inserts, despite being advised by board inspectors such products would be considered misbranded; and providing false information to a board inspector.

**Action**: The license is revoked, the revocation is stayed, and the licensee is placed on probation for five years subject to the terms and conditions in the decision. **Decision effective 11/15/2017. View the Decision**

Hoffman, Monica M., EXC 22306, Administrative Case AC 5185
Huntington Beach, CA

**Summary**: Violations include operating an unlicensed licensed entity that received prescriptions for compounded drug products,

Amos, Aniece L., RPH 36840, Administrative Case AC 5551
Murrieta, CA
Summary: Violations include unauthorized receipt and delivery of prescriptions and prescription medication. Respondent established the pharmacy pickup and drop-off service at an unlicensed central delivery location of an unlicensed retail pharmacy. Additional violations include unauthorized deposit of a prescription and unauthorized electronic transmission of

See Disciplinary actions, Page 38
Disciplinary actions
Continued from page 37

prescriptions. Respondent also created and established the process of retaining records of acquisition and disposition of dangerous drugs at an unlicensed location.

Action: The license is voluntarily surrendered.
Decision effective 3/28/2018. View the decision

Batra, Sakat, RPH 57999, Administrative Case AC 5980
Campbell, CA
Summary: Violations include a conviction for forging prescriptions. Respondent signed the name of another and of a fictitious person; and falsely made, altered, forged, uttered, passed and attempted to pass as genuine a prescription for a drug.

Action: The license is voluntarily surrendered.
Decision effective 3/15/2018. View the decision

Bauman, Paul, RPH 39495, Administrative Case AC 6058
Sonora, CA
Summary: Violations include a conviction for child pornography and possession or control of child pornography.

Action: The license is revoked, and the right to practice or operate has ended.
Decision effective 2/22/2018. View the decision

Bhalla, Sanjiv, RPH 46064, Administrative Case AC 5251
Santa Barbara, CA
Summary: Violations include failing to exercise corresponding responsibility by failing to validate the legitimacy of prescriptions. Respondent also was unable to account for the records for sale, acquisition, and/or disposition of dangerous drugs for at least three years. Respondent also dispensed prescriptions that contained significant errors, omissions, irregularities, uncertainties, ambiguities, or alterations.

Action: The license is revoked, the revocation is stayed, and the licensee is placed on probation for four years subject to the terms and conditions in the decision.
Decision effective 2/21/2018. View the decision

Botros, Samih Nabil, RPH 48680, Administrative Case AC 6083
Mission Viejo, CA
Summary: Violations include inadequate record keeping. Respondent failed to list in the compounding log the expiration date of each component used to compound, failed to maintain current written policies and procedures for compounding, and failed to review the policy and procedures compounding manual on an annual basis and update it. Respondent also failed to assign proper beyond use dates for certain nonsterile drug products; compounded and dispensed drugs containing expired components; dispensed drugs labeled with wrong strength and wrong expiration dates; and compounded commercially available drug products.

Action: The license is revoked, the revocation is stayed, and the licensee is placed on probation for three years subject to the terms and conditions in the decision.
Decision effective 1/12/2018. View the decision

Brody, Wendy Re, RPH 42050, Administrative Case AC 6302
San Diego, CA
Summary: Violations include unprofessional conduct. Respondent stole controlled substances from her employer; obtained controlled substances by deceit and subterfuge; possessed controlled substances without a prescription; illegally furnished controlled substances to herself; self-administered controlled substances that she had stolen from her employer; and failed to comply with all the terms and conditions of license probation previously ordered by the board.

Action: The license is voluntarily surrendered.
Decision effective 3/28/2018. View the decision

Brown, Alan D., RPH 22146, Administrative Case AC 5813
Bellevue, WA
Summary: Violations include unprofessional conduct. As pharmacist-in-charge, respondent failed to secure the pharmacy to prevent loss of controlled substances and failed to maintain a “current inventory,” as he was unable to account for 9,675 tablets of controlled substances. Respondent also held misbranded drugs that were found on the pharmacy shelves among the pharmacy’s active inventory during a board inspection on or about June 2, 2014. Respondent allowed

See Disciplinary actions, Page 39
Disciplinary actions

unauthorized personnel into the pharmacy without a pharmacist present.
Action: The license is voluntarily surrendered.
Decision effective 2/1/2018.
View the decision

Carter, Orenthal J., RPH 68823, Administrative Case AC 5426
Los Angeles, CA
Summary: Violations include a conviction for driving under the influence of alcohol.
Respondent also was disciplined by the Alabama State Board of Pharmacy for verifying prescriptions or dispensing medication for a patient called in by the patient’s sister (a California physician), knowing that there was no valid relationship between the patient and the physician to justify dispensing the medications. In addition, the Louisiana Board of Pharmacy issued a letter of reprimand to respondent for failing to reveal a criminal incident (disturbing the peace) on his application for license renewal, as required.
Action: The license is revoked, the revocation is stayed, and the licensee is placed on probation for five years subject to the terms and conditions in the decision.
Decision effective 3/15/2018.
View the decision

Castle, Nabila, RPH 54749, Administrative Case AC 6110
Anaheim, CA
Summary: Violations include respondent’s admission during a traffic stop that she was under the influence of methamphetamines. A board investigation disclosed around April 2017 that respondent filled her own prescriptions for controlled substances (alprazolam and Adderall) and dispensed them to herself in different dosages than was prescribed.
Action: The license is revoked, and the right to practice or operate has ended.
View the decision

Chacko, Annie, RPH 67019, Administrative Case AC 5814
Anaheim, CA
Summary: Violations include respondent as a pharmacist-in-charge failed to inventory a complete and accurate record of all controlled substances on hand on the date the inventory was taken and failed to maintain it in written, typewritten, or printed form at the register location. Respondent also failed to take a new inventory of all stocks of controlled substances on hand at least every two years.
Action: The license is revoked, the revocation is stayed, and the licensee is placed on probation for two years subject to the terms and conditions in the decision.
Decision effective 1/10/2018.
View the decision

Chae, Warren S., RPH 58955, Administrative Case AC 4392
San Francisco, CA
Summary: A psychological assessment determined the respondent was unable to practice his profession safely.
Action: The license is revoked, the revocation is stayed, and the licensee is placed on probation for four years subject to the terms and conditions in the decision.
Decision effective 2/15/2018.
View the decision

Dawly, Laura M., RPH 55947, Administrative Case AC 5694
Apple Valley, CA
Summary: Violations include findings of unprofessional conduct. Respondent deviated from the requirements of a prescription without the prior consent of the prescriber; dispensed a dangerous drug in an incorrectly labeled container; failed to complete quality assurance reports for all reported medication errors; dispensed a post-dated prescription; and dispensed dangerous drugs she knew or reasonably should have known were adulterated in that they had been returned by a patient and could not be shown to satisfy statutory requirements for quality and strength.
Action: The license is revoked, the revocation is stayed, and the licensee is placed on probation for three years subject to the terms and conditions in the decision.
View the decision

Desai, Bhavesh Jayati, RPH 53625, Administrative Case AC 5973
San Bernardino, CA
Summary: Violations include acts of unprofessional conduct. Respondent was pharmacist-in-charge when his staff telephonically transmitted a false authorization for a prescription of Fentora to a patient’s

Forman, John R., RPH 74026, Administrative Case AC 6046
San Rafael, CA

Summary: Violations include a conviction for driving with excessive blood alcohol level.

Action: The license is revoked, the revocation is stayed, and the licensee is placed on probation for three years subject to the terms and conditions in the decision.

Decision effective 1/10/2018.
View the decision

Holloman, Lisa C, RPH 47988, Administrative Case AC 5233
West Hollywood, CA

Summary: Violations include unprofessional conduct in that respondent committed acts of dishonesty and fraud as pharmacist-in-charge when the pharmacy did not reverse insurance claims for certain Medicare Part D patients’ prescriptions; record keeping violations for failing to maintain a proper inventory; and misbranding of drugs that were found without proper labeling. Further, violations included that respondent misrepresented documents when she falsely stated the pharmacy had in place policies and procedures to help patients with limited or no English understand the information on the prescription medication labels.

Action: The license is subject to a public reproval.

View the decision

Huynh, Ba Van, RPH 55924, Administrative Case AC 5549
Clovis, CA

Summary: Violations include unprofessional conduct in that respondent dispensed numerous prescriptions under questionable circumstances; furnished excessive controlled substances; and failed to report to the DOJ the required information for Schedule II, III, and IV controlled substances.

Action: The license is revoked, the revocation is stayed, and the licensee is placed on probation for five years subject to the terms and conditions in the decision.

2018 Pharmacy Board meetings

Information about all board and committee meetings – including dates, locations, agendas and materials that include background information for agenda items – is available at the Board of Pharmacy website.

Agendas are posted at least 10 days before each meeting. Background materials for agenda items typically are available to read and download about five days before each meeting.

For most board meetings, pharmacists and pharmacy technicians who attend a full-day meeting on the designated date may be awarded six CE hours per renewal period. Attendees requesting CE must sign in and out on an attendance sheet at the meeting with their first and last name, license number, and time of arrival and departure.

Board of Pharmacy meetings in 2018 are scheduled for July 24-25; Sept. 6; Oct. 23-24; and Dec. 12. When feasible, board meetings are webcast here.

Information about additional board meetings will be posted on the website as they are scheduled.
